Jagjeet Singh

Freelance Video Editor @ Truffle Nation | Video editing, After FX
Delhi, India

Summary

As an AI Video Editor, I create and manage high-quality short-form video content using a combination of video editing, AI tools, and live production workflows. My work focuses on producing visually engaging content through editing, AI-generated B-roll, and prompt-based video creation while maintaining a consistent visual style across multiple videos. I also handle live online production setups using camera systems and OBS, ensuring smooth recording and streaming workflows. By using tools such as ChatGPT, Claude, and Freepik Spaces (with multiple AI models for video and image generation), I streamline the content creation process and produce multiple video assets efficiently. I focus on blending creative storytelling with AI-assisted production techniques to deliver modern, high-impact digital content.

Experience

Freelance Video Editor

Edited a variety of video content such as promotional videos, reels, and YouTube content. Delivered customized edits based on individual client needs and brand aesthetics. Handled the complete post-production workflow, including color correction, sound design, and motion graphics.

Get Your Reach

Graphic Designer

Created visually appealing graphics and promotional content for social media platforms. Shot and edited videos for reels, stories, and promotional campaigns. Collaborated with the content and marketing teams to align visuals with brand messaging. Managed end-to-end video production, including planning, shooting, editing, and post-production. Ensured consistency in visual branding across all social media platforms

TRY BALL

Video Editor

Edited the official music video, handling complete post-production. Synced visuals with beats and lyrics for dynamic storytelling. Applied color grading and motion graphics for a polished look. Worked closely with the artist team to match creative vision.
